

INDEPENDENT · VENDOR NEUTRAL · FIXED FEE

TECHNOLOGY AUDIT

A clear, practical review of your full technology environment.

Plain-English report. Real risks. Actionable next steps.

OVERVIEW

WHY AN AUDIT?

Most Western Australian businesses are running on technology stacks that have grown organically over years - patched, layered, and rarely reviewed end-to-end. Our Technology Audit gives you a single, structured view of what you have, what is working, what is at risk, and what to do next. Independent. Vendor-neutral. Written for business decision-makers, not just IT teams.

THE AUDIT

WHAT, WHO, WHY.

WHAT IS IT

A structured review of your full IT environment - covering systems, security, support, and spend.

- Microsoft 365 & cloud setup
- Network & connectivity
- Cyber security posture
- Backup & disaster recovery
- Devices & endpoints
- Software & licensing
- Support model & documentation

WHO IS IT FOR

WA businesses with 10 to 100 staff that rely on technology daily.

- Frustrated with reactive IT
- Uncertain about security or backup
- Microsoft 365 environment is messy
- Outgrown the current provider
- Planning to expand or relocate
- Want an independent baseline

WHY AN AUDIT

Most businesses are surprised by at least one of these:

- Backups never restore-tested
- Ex-staff accounts still active
- No MFA on email or remote access
- OneDrive owned by ex-employees
- Licences paying for ghost users
- Network hardware near end-of-life

DELIVERABLES

WHAT YOU RECEIVE

- ✓ **PLAIN-ENGLISH AUDIT REPORT**
A clear, readable document built for business owners and operations managers. No jargon, no acronym soup.
- ✓ **RISK REGISTER**
Every risk documented and ranked by severity, with plain-English business impact statements.
- ✓ **PRIORITY RECOMMENDATIONS**
A ranked list of what to address first, second, and third, with clear reasoning for each.
- ✓ **MANAGED SERVICES SUITABILITY**
An honest assessment of whether managed technology makes sense for your business.
- ✓ **GOOD / BAD / UGLY SUMMARY**
A frank, colour-coded view: what is solid, what needs attention, what is genuinely at risk.
- ✓ **QUICK WINS**
Immediate actions you can take without major cost, disruption, or technical complexity.
- ✓ **TECHNOLOGY ROADMAP**
A practical 6 to 12 month improvement path aligned to your business goals and budget.
